

SKU : 101360

KF 6000 OPTIEDGE is a cost-effective portable edge beveler. Proven even under rough use conditions, this device is the optimal choice for chamfering or beveling plates from wide range of materials.

- powerful servomotor for infinitely variable

TECHNICAL SPECS

WORKING AREA

| | |
|---------------------|------------|
| Guide bar length | 230 mm |
| Chamfer width, max. | 10 mm |
| Speed | 6000 1/min |
| Angle adjustment | 15 - 45° |

DRIVE CAPACITY

| | |
|-------------------------|---------|
| Motor rating main drive | 0.75 kW |
|-------------------------|---------|

MEASURES AND WEIGHTS

| | |
|--|-------------------------|
| Overall dimensions (length x width x height) | 0.3 m x 0.23 m x 0.18 m |
| Weight | 9.28 kg |

PRODUCT DETAILS

- Proven under rough, commercial use conditions
- For deburring, chamfering, bevelling, and cost-effective weld seam preparation at straight workpiece edges
- One machine for two applications: Use directly at the workpiece to machine large dies, includes a special mount for easy change-over to stationary operation
- Suitable for steel, stainless steel, aluminum, non-ferrous metals and acrylics

STANDARD EQUIPMENT

Cutter head
Dies
Operator instructions
