

SKU : 130042

Single-column presses or C-frame presses are used in a wide range of metal, rubber, and plastic machining applications. This compact machine is ideally suited for pressing, straightening, and bending, but can also be used for press-fitting and extracting shafts and bearings. The robust hydraulic cylinder is height-adjustable and includes a pressure gauge. Piston retracts automatically.

- Compact design
- Pressure gauge
- Adjustable hydraulic cylinder
- V-blocks

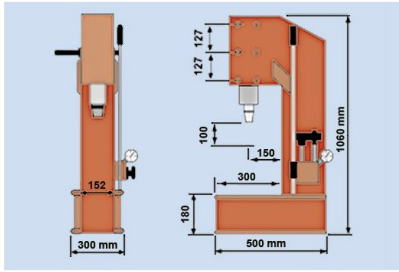

TECHNICAL SPECS

WORKING AREA

Pressure force	15 t
Operating pressure (max.)	294 bar
Table dimensions	300 mm x 300 mm
Piston bore	80 mm
Ram-to-table surface distance	500 mm

MEASURES AND WEIGHTS

Height	1060 mm
Weight	145 kg

PRODUCT DETAILS

- Very sturdy and torsionally rigid construction
- Infinitely variable pressure
- Pressure gauge
