| | |
|---------------------------|-----------|
| Pressure force | 15 t |
| Operating pressure (max.) | 382.2 bar |
| Total piston stroke | 160 mm |
| Throat width | 560 mm |

MEASURES AND WEIGHTS

| | |
|---|-------------------------|
| Hydraulic tank volume | 1.65 l |
| Weight | 117 kg |
| Overall dimensions (length x width x height) | 0.83 m x 0.6 m x 1.93 m |

PRODUCT DETAILS

For any repair and installation work, e.g.:

- Removal and installation of press-fit bearings, bolts and bushings
- Straightening beams, shafts, axles and sections
- Pressing and crimping
- Load tests and weld sample testing
- Straightening of workpieces
- Material testing
- Rigid machine frame featuring a carefully machined weldment structure
- Hydraulic pump can be operated by hand or foot control
- 2-step hydraulics - with change-over switch for changing between quick-stroke and work stroke
- Automatic reset of piston, controllable by user via throttle valve and spring
- The support table features a rigid design, but is easy to handle with adjustable height
- Includes multi-function die for straightening flat material and corrugation
- Table lifting system
