

SKU : 131743

These manual hydraulic workshop presses are built in Europe and are suitable for general assembly and straightening work or for testing workpieces. They enable safe and professional work and are mainly used in mechanical workshops, garages and locksmiths.

- High quality - Made in Europe
- With hand and foot control
- Adjustable table height
- Material support included

TECHNICAL SPECS

WORKING AREA

Pressure force	50 t
Operating pressure (max.)	399.5 bar
Total piston stroke	160 mm
Throat width	750 mm

MEASURES AND WEIGHTS

Hydraulic tank volume	1.65 l
Weight	250 kg
Overall dimensions (length x width x height)	1.1 m x 0.76 m x 2.12 m

PRODUCT DETAILS

KNWP 30 is shown

For any repair and installation work, e.g.:

- Removal and installation of press-fit bearings, bolts and bushings
- Straightening beams, shafts, axles and sections
- Pressing and crimping
- Load tests and weld sample testing
- Straightening of workpieces
- Material testing
- Rigid machine frame featuring a carefully machined weldment structure
- Hydraulic pump can be operated by hand or foot control
- 2-step hydraulics - with change-over switch for changing between quick-stroke and work stroke
- Automatic reset of piston, controllable by user via throttle valve and spring
- The support table features a rigid design, but is easy to handle with adjustable height
- Includes multi-function die for straightening flat material and corrugation
- Table lifting system
- The smooth-running, horizontally adjustable working cylinder simplifies set-up (KNWP 50M only)
